

ADAM DOST

PROFESSIONAL ACHIEVEMENTS

SPLUNK CERTIFIED CONSULTANT

- As of July 2017, I am certified as a Splunk Consultant and have passed field readiness training and understand how to create and administrate a customer's environment so they can bring as much value as they can from the Splunk Product with my knowledge of Splunk best practices and installations.

SPLUNK CERTIFIED ARCHITECT

- Splunk works best when both fed and tuned the right equipment and settings. As a certified architect, I understand hardware requirements and settings needed to have the product up and running.

SPLUNK ADMINISTRATOR CERTIFIED

- Each organization has requirements that must be met and with Splunk I can tailor those requirements to your organization's needs. Searches and reports can be tuned so that there's more processor power to work with other jobs

SPLUNK APP DEVELOPMENT

- Built a Reddit App for Splunk that can help new Splunker's use the platform with data they are familiar with. Will share demo upon request.
- Developed the framework for the original Splunk DFAR App that showed that Splunk could assist in NIST800-171 requirements

SKILLS

SPLUNK CERTIFIED CONSULTANT, ARCHITECT AND ADMINISTRATOR
PYTHON
VHDL
GIT
